DETAILED ACTION

This Supplemental Allowance After Examination is to make a correction to a discrepancy to the previous Allowance After Examination. The discrepancy is that claim 73 was mistakenly indicated canceled. Therefore, claim 73 is included in this Supplemental Allowance After Examination for allowance.

Claims 37-78 and 89 are pending. Claims 1-36, 79-88 have been canceled. Claims 37-78 and 89 have been examined. Claims 37-78 and 89 have been allowed.

Allowable Subject Matter

Claims 37-78 and 89 are allowed. The following is an examiner's statement of reasons for allowance:

1. As per claim 37, the prior arts of record do not teach generating said FSM simulation in combination with comprising applying a design language having at least one graphical symbol and adapted to form a finite state machine representation of electronic hardware, each graphical symbol of the design language having a graphical portion and a user-definable textual portion defining the behavior of the graphical symbol and a virtual test-bench for selecting signals or variables associated with the FSM as described in paragraph 0098 on pages 31-32 and paragraph 0101 on page 34 of the specification.
2. As per claim 37, the prior arts of record do not teach generating a virtual hardware component that is a finite state machine (FSM) in combination with comprising applying a design language having at least one graphical symbol and adapted to form an FSM

representation of electronic hardware as described in paragraph 0098 on pages 31-32 of the specification.

3. As per claim 64, the prior arts of record do not teach generating a virtual hardware component that is a finite state machine (FSM) in combination with comprising applying a design language having at least one graphical symbol and adapted to form an FSM representation of electronic hardware and a virtual test-bench for selecting signals or variables associated with the FSM as described in paragraph 0098 on pages 31-32 and paragraph 0101 on page 34 of the specification.
4. As per claim 68, the prior arts of record do not teach a finite state machine (FSM) in combination with representation of a hardware element within the embedded system, configured to couple memory read/write requests and interrupt signals and a virtual test-bench for selecting signals or variables associated with the FSM as described in paragraph 0098 on pages 31-32 and paragraph 0101 on page 34 of the specification.
5. As per claim 74, the prior arts of record do not teach generating said FSM simulation in combination with comprising applying a design language having at least one graphical symbol and adapted to form a finite state machine representation of electronic hardware, each graphical symbol of the design language having a graphical portion and a user-definable textual portion defining the behavior of the graphical symbol and a virtual test-bench for selecting signals or variables associated with the FSM as described in paragraph 0098 on pages 31-32 and paragraph 0101 on page 34 of the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
